

Name | **Kopi Arabika Java Ijen Raung**
Country | **Indonesia**

Date of registration

10 - 09 - 2013

Source: DGIP

Main characteristics/features

The acidity level of this coffee is quite high. The quality is characterised by an intense aroma with a subtle flowery fragrance, a medium body, and a uniquely sweet flavour, that is not too bitter or too astringent.

Geographical area

The Java Ijen Raung Arabica Coffee production areas are located on the Ijen-Raung plateau, which consists of Mount Ijen and Mount Raung in the districts of Sempol, Sumberwringin, Botolinggo, Arjasa and Cermee in the Situbondo regency, in the province of East Java.

Process of production/processing

Java Ijen Raung Arabica Coffee comes from plantations that grow in the highlands of Ijen-Raung at an altitude of 900m above sea level. The Arabica coffee plants from the Ijen-Raung plateau come from a selected variety of coffee. This shade-grown coffee is grown in combination with other plants that are organically maintained. Ripe coffee cherries are hand-picked and carefully selected with a proportion of at least 95% red cherries. These coffee cherries are then processed by wet fermentation for 12 to 36 hours, and sundried. Java Ijen Raung Arabica Coffee is sold in the form of dried green coffee, roasted coffee and ground coffee.

Link between the product and the territory

The traditional method used by the local communities for producing coffee beans is one of the main factors that has made Java Ijen Raung Arabica Coffee so special. The geographical environment contains volcanic soils, such as andisols with high physical and chemical fertility factors, at an altitude of between 900 and 1500m above sea level. This region has cool and dry air, with an average rainfall of 1 514 mm per year, with five to six dry months per year as well as temperatures varying between 15°C and 25°C. A high-quality coffee is created thanks to the agricultural ecosystem being very suitable for Arabica coffee and its climatic conditions combined with the know-how of the manufacturers.
