

Name **Teh Java Preanger
(Java Preanger tea)**
Country **Indonesia**

Date of registration:
23/12/2015

Source: DGIP, Google

Main characteristics/features

The taste/aroma characteristics, based on an organoleptic test, are: Steamed green tea: thick astringent taste, brisk aftertaste, steamed peanut aroma; Pan-fired green tea: mild astringent taste, citrus flower aroma; White tea: mild taste and rose aroma.

Geographical area

Steamed green tea comes from the Neglasari farmers' tea plantation on the slopes of Mount Tilu (1 498-1 520 masl). Pan-fired green tea comes from the Canaan State tea plantation on the slopes of Mount Gedogan (1 350-1 500 masl). White tea comes from the PPTK Gamboeng tea plantation in the area of Mount Tilu (approx. 1 350 masl).

Production/processing

Java Preanger tea (Teh Java Preanger) is a premium tea, produced from good quality leaf buds grown in the mountains of the geographical area of West Java province. Currently, the plantations are maintained and developed through tillage, selection of plant varieties, seed preparation and planting procedures, cropping patterns and maintenance (fertilisation, pruning, pest and disease control), according to the good agriculture practices (GAP) standards. Tea leaf shoots are processed, from harvesting to post-harvest handling, production and processing, according to the good manufacturing practices (GMP) standards, to produce steamed green tea, pan-fired green tea and white tea of geographical indication quality standards. Packaging and storage processes must also conform to established standards to maintain the quality of the resulting tea.

Link between product and territory

The soil in the planting area belongs to the andosol, inceptisol and entisol soil types. Temperatures range from 13 to 25 C, with an annual rainfall of more than 2 000 mm, a wet season of at least nine months each year, and a relative humidity (RH) of over 70 %. This tea product is derived from the leaves of the *Camellia sinensis assamica* plant variety, with TRI 2025 and Gambung series clones, that are picked and processed by the trained Sundanese community.
