

Name Kopi Robusta Pupuan Bali
(Pupuan Bali Robusta
Coffee)
Country Indonesia

Date of registration:
29/05/2017

Source: DGIP, Google

Main characteristics/features

Pupuan Bali Robusta coffee (Kopi Robusta Pupuan Bali) has the following taste characteristics: clean, chocolatey, caramelly, rather flowery, nutty, spicy, buttery, cucumber. It is excellent and has no flavour defects.

Geographical area

The cultivation area is in the subdistrict of Pupuan, Tabanan regency, which is located in a hilly area with elevations above 500 masl.

Production/processing

The coffee cherries harvested must be ripe and red. Once picked they must be processed using the wet, dry or honey methods within a maximum of 4 days. Red cherries that are dried in the sun for more than 4 days will produce brown beans, which can cause flavour defects due to fermentation. The coffee is dried naturally in the sun on drying floors, tarpaulins or para-para (raised drying platforms) until they reach a water content of 12 %. The dried coffee beans are sorted and stored in clean sacks in a clean room and protected from water, strong odours and vermin by covering them with bamboo mats.

Link between product and territory

Pupuan Bali Robusta coffee is produced from robusta coffee bushes grown at elevations above 500 masl. The hilly dominated topography is made up of regosol, latosol, lithosol and andosol soil types, with a soil pH between 5 and 6. The Pupuan region has an average rainfall of 3 675 mm/yr, and 161 rainy days/yr. The temperature range in this region is between 24-30 °C with 74-77 % humidity. The strong social, economic and cultural factors in the Pupuan community play an important role in the production of Pupuan Bali Robusta coffee.
