

Name | Huế Palm-Leaf Conical Hat
Country | Vietnam

Date of registration

19/07/2010

Main characteristics/features

Huế palm-leaf conical hats are typical:

- Colour: typical greenish white colour with a few embellished light blue lines along the longitudinal direction of the palm leaves, so the colour of the product is basically white.
- Shape: thin, light, elegant, lithe, durable, and well-proportioned.

Production/processing

The manufacturing steps of the Huế palm-leaf conical hat include: preliminary processing of palm leaves, manufacture of the hat frame, brim and thread.

Source: NOIP

Geographical area

The Huế palm-leaf conical hat production area is located in: the areas of leaf production: A Lưới and Nam Đông districts – The material areas for the hat brim: Bình Điền commune in Hương Trà district; Regions where preliminary processing of the leaf takes place: Phước Vĩnh and Đốc Sơ of An Hoà in Huế city - production regions for the hat frame: Phước Vĩnh in Huế city and Phú Mỹ in Phú Vang district. Sewing villages: Đốc Sơ, An Hoà in Huế city; Mỹ Lam and An Lưu in Phú Mỹ commune; Đông Đỗ and Đông Di in Phú Hồ commune; Tân Mỹ in Thuận An town; Thanh Dương of Phú Diên; Truyền Nam in Phú An commune; Dương Nổ in Phú Dương commune in Phú Vang district; Thanh Tân in Phong Sơn commune in Phong Điền district; Hương Càn in Hương Toàn commune in Hương Trà district; Thủy Thanh commune in Hương Thủy district; Phủ Cam in Phước Vĩnh commune in Huế city.

Link between product and territory

Along with traditional long dresses, Huế palm-leaf conical hats are closely linked with Vietnamese women and are regarded as part of their national costume. The characteristics of the Huế palm-leaf conical hat depend on natural conditions that have an effect on the development of the leaf in Nam Đông and A Lưới districts in Thừa Thiên Huế province, and also the human impact on the production region (belonging to the plains districts) and leaf drying techniques and materials production.
