Đồng Giao Cayene pineapple has cylinder shape, slight yellow-orange colour, aromatic scent and no fibre, the weight is 1.53 to 1.78 kg per fruit.. Đồng Giao Queen pineapple has cylinder shape, straw yellow colour, aromatic scent, sweet taste and no fibre, the weight is 0.54 to 0.61 kg per fruit.

Phủ Long and Quảng Lạc communes of Nho Quan districts;

Đông Sơn, Quang Sơn communes and Trung Sơn, Nam Sơn wards of Tam Điệp city, Ninh Bình province.

Production and processing

Link between product and territory

Variety: Cayene or Queen pineapple.
Planting season: Main season: January to March; Off season: May to July.
Density: 60 – 66 thousand spouts per hectare in double rows formation. Blooming are stimulated using powder or liquid calcium carbide. Harvest is done in April to June and in July to September. After being harvested, pineapples shall be stored in cool storage no later than 24 hours in the summer or 36 hours in the spring.

The terrain characteristics of the geographical area create a consistent climate and good drainage, which are favourable for production of pineapple. The soil has a high clay content and is nutritious (especially trace elements), which helps retaining water and nutrition, satisfying the requirements of pineapple, significantly impact the quality of pineapple.
