#### Production/processing

In Vị Xuyên, the farmers have formulated their own rules and regulation on the conservation of the forest and protection for the lanxangia tsaoko gardens, with cross monitoring and inspection is conducted by producers. Thanks to that, lanxangia tsaoko is harvested in the right season with the assurance of ripeness and highest quality. At the same time, during the growth of the plant, the producers use no fertilizer and pesticide to ensure the quality and food safety of the product.

#### Link between product and territory

Thanks to the low temperature, high rainfall (Vị Xuyên is among the areas with highest rainfall in Viet Nam), especially in May and June when lanxangia tsaoko flower bloom, the number of fruits of Vị Xuyên lanxangia tsaoko is lower than other areas', but the fruits are bigger and juicier, the sizes are more consistent and have no underdeveloped seed. Vị Xuyên lanxangia tsaoko is cultivated under the shade from forest foliage of trees with wide leaves. Therefore, the soil for Vị Xuyên lanxangia tsaoko has considerably thick O horizon of 20 - 40 cm, the higher the altitude, the thicker the O horizon. The O horizon is one of the decisive elements to the productivity and quality of lanxangia tsaoko.
